

Above and Beyond...

...that's where we go for you.

Turnkey Aviation Fueling Product Solutions

From the fuel farm to the aircraft and everything in between, Cla-Val is the only manufacturer who can provide the products you need to achieve safe and efficient aviation fueling.

Starting at the fuel storage farm, Cla-Val valves are used to control tank levels and provide high-level shut-off capabilities. Pressure Relief and Back Pressure Valves help to protect the piping network from surges while maintaining constant back pressure. Pump, Filter Separator and Digital Control Valves are used to hydraulically control fuel pumping systems.

On the tarmac, our hydrant pit valves and pressure couplers are utilized to safely deliver fuel to refueling trucks equipped with Cla-Val nozzles designed to mate with a wide range of fueling connections.

Engineering Expertise and Field Support

In addition to an extensive product range, Cla-Val also offers the best customer service in the industry, backed by knowledgeable field support professionals with decades of experience. An in-house team of Aviation Fueling Engineers work to develop new solutions and continuously improve the products you rely on to operate your aircraft fueling systems.
