

► Simple, Reliable and Accurate

- Completely Automatic Operation
- Easy Adjustment and Maintenance
- Quality Approved Materials
- World Wide Support Link2Valves Platform

► CLA-VAL SERIES D35 Main Function

D35 Autonomous Electronic Valve Controller

CLA-VAL SERIES D35 switches a latching solenoid by means of a CLA-VAL D35 autonomous electronic valve controller, according to predefined time, flow, level and/or pressure rules, or upon remote command.

CLA-VAL SERIES D35 optionally communicates through the 4G (LTE-M or NB-IoT) and 2G (GPRS) cellular networks for remote monitoring and control.

► CLA-VAL D35-136-01 Typical Application

The CLA-VAL D35-136-01 is designed to fully open or fully close the valve according to flow, time and/or pressure conditions, or upon remote command.

The CLA-VAL D35-136-01 is typically designed for industrial uses like control of process water for batching, mixing, washing, or other on/off applications such as flushing valves.

When combined with the CLA-VAL Link2Valves platform, it offers a plug & play secured remote valve monitoring and control solution.

Make your valve even Better!

LFS Option?	<u>Control</u> Low flows or night flows
KO Option?	<u>Extend</u> valve life with Anti-Cavitation trim
KG1 Option?	<u>Use</u> stem cleaning for harsh water
Maintenance?	<u>Check</u> on periodic maintenance
Environment?	<u>Adapt</u> to high temperatures or frost risk
Security?	<u>Add</u> hydraulic safety back-up to your valve
Protection?	<u>Remove</u> excessive system overpressures
Corrosion?	<u>Protect</u> your valve with upgraded materials
